## Step 2 Cost basis election

Mutual funds must report the cost basis on any shares purchased on or after January 1, 2012 ("covered shares"). DWS has adopted Average Cost as the default calculation method, so this method will apply to your account(s) if no previous election was ever made. Under this method, cost basis will be calculated based on an average price of all "covered shares" purchased into your account and the holding period to determine whether any gain or loss is short-term or long-term.

Please indicate below which type of cost basis you would like us to furnish you and the IRS for all accounts identified.

If no fund name or number is specified below, the cost basis election will apply to all funds under the account number(s) provided. If you would like to provide selections for more than two accounts, please attach an additional form.
